

What's what in your heating statement?

'Variable charge' (variabelt bidrag) is the payment for your metered district heating usage. Monitor consumption using our self-service or the E|Forsyning app. You will need your account number and online PIN code to log in. They are at the top of your statement.

'Standing charge' (fast bidrag) is the price everyone pays to be part of the district heating network. The standing charge is an average of your usage over the last 3 years. If you're a new customer, your standing charge for the first three full years will be adjusted in line with your metered district heating usage.

'Administrative charge' (administrationsbidrag) is a set amount paid by all district heating customers.

'Incentive rate' (incitamentstakst) is payable if you don't make the best use of your heating. The water must be cool before it returns to us. If 'Cooling – refund' (returtemperatur – refusion) is displayed, you will receive a refund. Conversely, if 'Returtemperatur – fee' (returtemperatur – afgift) is displayed, you will have to pay this.

'Opening and closing' (start og slut) shows the reading at the beginning and end of the period covered by the heating statement. Your meter will be read several times a year and always at the start of a new year. If you are moving in or out, the meter will be read on the cut-off date.

'Consumption period' (forbrugsperioden) is the period covered by the statement.

'Financing agreements' (finansieringsaftaler) may be of various types. In 2015, they were replaced by Plan A, where we own and service the unit. If you have a financing agreement with us, the terms will be stated on the agreement itself.

'Unit of measurement' (måleenheden) shows whether your usage is metered in GJ (gigajoules) or MWh (megawatt hours). You can see the same unit of measurement on your meter.
